

INDUSTRIAL POWER COOLING LTD

Complete Capability. Industrial Air Coolers and Heat Exchangers from conceptual design through manufacturing to specialist site services.

t: 00 44 (0) 845 8739916 f: 00 44 (0) 845 8739924 e: info@ipcuk.com

IPC can keep your plate heat exchangers in shape by offering a service and chemical dip to remove any of the corrosive fluids which cause increased pressure drop and performance problems. The service team can call out to the where a full assessment is made on the system. The exchanger is removed and sent back to the service centre where a full reconditioning process takes place with new gaskets and seals to bring your plate heat exchanger back up to optimum performance. Please call for details Tel : 0845 873 9916

This is proven to increase the life of the Plate Heat Exchanger and to make sure it's working to optimum performance.
